

AEA080-AEA121 External Antennas for the AIR200 Reader

The unique combination of the AIR200 ISO reader and the robust Windows® handheld computer Workabout Pro of Psion Teklogix® becomes even more flexible with the different external antennas

for the AIR200. There are three versions for different applications available, the AEA080 stick antenna, the AEA090 attachable stick antenna and the AEA121 attachable telescopic antenna.

Advantages of AEA080–AEA121

More reading flexibility with external antennas

With the integrated antenna of the AIR200 reader the combination of the AIR200 ISO Reader and the Workabout Pro Windows® Handheld computer of PSION TEKLOGIX is already very flexible. Nevertheless the variation of possible applications becomes much wider with the different external antennas available.

The AEA080 Antenna

Is a simple solution to read transponders, ear tags and bolus that are more difficult to reach due to the location of the animal or to prevent a too close contact to the animal.

AEA080 with AIR200

The AEA090 Antenna

It offers an equal length of stick antenna than AEA080 but with the additional possibility to attach it to the back of the workabout pro it supports the one-hand reading concept and is the right solution when easy handling and a certain robustness is required for higher operation speed.

AEA090 with AIR200

The AEA121 Antenna

It is the right choice if a flexible length antenna is required e.g. for a more convenient transportation. Attached to the back of the Workabout Pro the AEA121 supports the one-hand reading concept and is the right solution when the long reading distance shall not reduce your mobility.

AEA121 with AIR200

Technical data of AEA080–AEA121

AEA080

Length	0.80 m
Weight	0.50 kg
Cable	1,5 m with plug for AIR200

AEA090

Length	0.90 m
Weight	0.65 kg

Metal mounting for Workabout G1 and G2
Works with standard and high capacity door

AEA121

Length	0.65 to 1.20 m
Weight	0.6 kg

Metal mounting for Workabout G1 and G2
Works with standard and high capacity door
