

letters

I've always wondered with new Magazines how letter pages are full in Issue One. If it's Issue One nobody can have read the magazine yet to have written in?

It may be the skeptic in me but I think the Editor makes them up!

Anyway, this is Issue one and I have no letters to publish, so please email submit@psioncomputer.com if you wish to have your ideas published in either 'Letters' or 'Hints & Tips'.

A free issue of the Journal will be added to your subscription for the star letter.

Now I can't say fairer than that!

The Psion Computer Society provides Psion users the world over a way to keep in touch and share in our common love of Psions.

The Society will have Pub meetings (mainly in the UK until International members get in contact to help organise their own) throughout the year.

Membership costs £4.00 a year on top of Journal subscription. This is to fund postage of the Society Update letter, room hire and if there's anything left, the first round of drinks!

I was hoping to get the first meeting set for December 2003 but getting Issue One of the Journal out has taken up all my time so far, but the first meeting should be in Q1 2004.

Visit www.pSIONcomputer.com/aboutsociety.htm for more details.

Hints & Tips

SIBO

Email Signature.

Your email signature is stored as a text file Mail09.sig in the \MAIL\directory.

This can be moved to another disk if you wish, but don't edit this file with Word or you'll corrupt it!

Application Kill.

Has an application or file crashed?

To kill a crashed application on a SIBO machine highlight the application or file and Press Shift-Psion-K.

Then reload the file.

Two Email Accounts.

You can get the Mail application to use two email accounts by using a separate Setup application file for each account.

See Chapter 2 of the PsiMail Internet User Guide for more information.

EPOC

Alarming!

To cancel an alarm once it's gone off normally requires user intervention. To get your Psion to cancel the alarm for you try setting a second alarm after the first with the alarm sound set to silent.

More to Calc.

Calc has a load of quick key short cuts. Press Shift+Ctrl+I in Calc to see them.

Slow browsing.

If your file browser is painfully slow try turning off the 'Show System Folder' in Preferences. This stops your Psion searching through the main system and app files.

Facts about fax.

To create your own Fax templates, create them in Word and then save them to c:\systems\templates\fax. In your next new fax you'll see your new template available.
