

## SSD Serial Numbers document

This document describes the composition of the serial number and defines the specific codes used.

### Composition

The 1<sup>st</sup> 3 digits are letters describing the **product type and variant**.

The 4<sup>th</sup> digit is a number which specifies the **year of manufacture**.

The 5<sup>th</sup> and 6<sup>th</sup> digits numbers which specify the **week of manufacture**.

The remaining digits are the unique **serial number**.

### Definitions

The codes allocated to the **product type and variant** (i.e. the 1<sup>st</sup> 3 digits) are defined in the tables below.

The **year of manufacture** code is a number between "1" and "9" where "1" represents the year 1993 and "9" represents the year 2001.

The **week of manufacture** code is a number between "01" and "52" where "01" represents the first week in January and "52" represents the last week in December.

The **serial number** is a unique identifier.

## MC + SSD Range

| 1 <sup>st</sup> digit | 2 <sup>nd</sup> digit | 3 <sup>rd</sup> digit | Definition                     |
|-----------------------|-----------------------|-----------------------|--------------------------------|
| B                     |                       |                       | <b>MC + SSD Range</b>          |
|                       | A                     |                       | Not Used                       |
